

GLOVES

# Neoprene Gloves

## Optimal Protection with Tactile Sensitivity

Designed to reduce the amount of scattered radiation exposure to the hands from the primary X-ray beam during radiological procedures. These gloves are Latex-Free, Lead-Free, and of course radiation protected.

- Lead-free
- Latex-free
- Powder-free
- High sensitivity
- 30% reduction of direct beam radiation transmitted at 100 kVp
- Packed in sterile pouch
- Shipped from stock

Color	White
Sizes	6.5, 7.0, 7.5, 8.0, 8.5, 9.0

Size	Model
6.5	683310
7	683315
7.5	683320
8	683325
8.5	683330
9	683335

Attenuation Properties		
Source Potential	Cuff Attenuation	Finger Attenuation
60 kVp	38%	49%
80 kVp	30%	40%
100 kVp	24%	33%
120 kVp	19%	27%
