

Adult Head Rest Kit

INF-9008

Improve the efficiency and patient experience of your CT imaging procedures using the Canon Aquilion CT machine using INFAB's Adult Head Rest Kit, a 2-piece kit composed of 2 different-sized head pads made of open-cell foam to maximize patient compatibility. The head pads provide comfort, stabilization, and support thanks to their open-cell foam substrate, which is soft and supportive. The INFAB Adult Head Rest Kit is the perfect addition to CT suites looking to improve their efficiency, streamline their procedures, and ensure patient comfort.

- Includes 2 different-sized head pads for maximum compatibility
- Ensures proper patient positioning and immobilization during CT scan procedures.
- Head pads provide comfort, support, and stabilization during the use of the head holder.
- All coverings/material are Latex Free, MRI Safe
